

COZY HOME • CURSED CATS • DIGITAL EXORCISM

A shared visual language for art, UI, animation and marketing

The world feels safe—until the cat looks back.

Ami is the emotional anchor. Her home, humour and everyday technology keep the supernatural approachable.

1 Cozy first

Warm light, wood, fabric, plants and lived-in clutter establish safety.

2 Playfully cursed

Cat eyes, impossible shadows and small glitches create unease without gore.

3 Ami-led

Keep Ami readable, capable and human; she is never swallowed by the effects.

4 Tech meets ritual

PC interfaces, network motifs and handmade charms belong in the same world.

AMI / PLAYER ANCHOR

tone mix 70% COZY / 20% MISCHIEVOUS / 10% UNCANNY

Build warmth first; layer possession on top.

HOUSE / 3D

Orthographic isometric camera
Soft-shaded medium-poly forms
Rounded edges and hand-painted materials
Warm pools of baked light

CHARACTERS / 2D

Clean anime illustration
Smooth edges, no pixel filtering
Simple shadow language
Readable silhouette before detail

HAUNTING / 2D + VFX

One silhouette + one spectral hue
Violet = cursed • mint = cleansing
No gore, pentagrams or heavy horror

Hybrid rule: 3D sells the physical home. 2D sells personality, communication and the supernatural.

Spectral colours signal state—not decoration.

MIDNIGHT INK

#17131F • Primary background

CHARCOAL PLUM

#2A2032 • Panels / shadows

HEARTH CREAM

#F4E7D3 • Text / paper

WARM AMBER

#E6A45B • Primary CTA

DUSTY ROSE

#C87985 • Human warmth

POSSESSED VIOLET

#8C5BC2 • Cursed state

SPECTRAL MINT

#75D0B1 • Success / cleanse

WARNING CORAL

#D85F57 • Failure / danger

SCREEN COLOUR WEIGHT

55% DARK NEUTRALS

25% WARM LIGHT

15% CHARACTER

5% SPECTRAL

SEMANTIC RULE

Amber invites action.
Violet indicates possession.
Mint confirms cleansing.
Coral means danger or loss.

Ruined lettering is personality—not body copy.

PRIMARY WORDMARK

Use on title screens, key art, app-store graphics and major chapter cards. Minimum digital width: 260 px.

MOBILE TYPE SCALE / 720 × 1280

H1 42–48 px • H2 30–36 px • CTA 24–28 px
Body 18–22 px • Metadata 14–16 px

The quick brown fox jumps over the lazy dog.

REFERENCE CHARACTER / narrow, irregular, sharp, handmade

DISPLAY

Custom Ruined-style

Logo • demon names • supernatural reveals

HEADINGS

Nunito Sans ExtraBold

Friendly, rounded, immediately readable

UI + BODY

Nunito Sans SemiBold

Buttons, dialogue, menus and contracts

TECH DATA

Space Mono Medium

Email addresses, timestamps and IDs only

NEVER use the ruined face below 32 px, in paragraphs, or for long translated strings.

Pair every cozy cue with one cursed cue.

COZY CUE

Parchment • warm highlight • tactile depth

Primary button

64–88 px tall • one primary CTA per screen

CURSED CUE

Ruined corners • cat-ear peaks • spectral edge

Dialogue bubble

Separate tail • 24 px padding • no baked text

PC / email panel

Dark surface • 2 px state border • flat hierarchy

COMPONENT PARAMETERS

CORNER CUT

12–20 px

BORDER

2–3 px

ICON STROKE

2.5 px

SHADOW

0 / 8 / 24 / 35%

PRESSED

Move 2 px down

DISABLED

45% opacity

The menu makes one choice obvious: Start Game.

DESIGN CANVAS

720 × 1280 portrait

- **Background** Fill / cover every aspect ratio; crop only non-essential room detail.
- **Safe margins** Keep functional UI inside 6% left/right and 10% top/bottom.
- **Logo** Maximum 54% of screen width; preserve clear space equal to the N stem.
- **Primary CTA** 64 px minimum visual height; one clear action on the first release.
- **Secondary** Settings and accessibility stay small, separate and inside safe area.

Keep essential content away from notches and rounded corners.

Ami leads; the curse stays in the room.

TARGET BALANCE

**Cozy at first glance.
Sharp at the point of action.**

01 Ami owns the centre

Her refined face, pose and silhouette remain clear beneath the logo and above the CTA.

02 Possession is environmental

Cat shadows, violet PC light and mint wisps carry the dark theme quietly.

03 Ruined edges signal action

The pointed Start Game frame echoes the wordmark without sacrificing readability.

Production note: build logo, button and settings as separate UI layers over a responsive background illustration.

Ami changes role—not identity.

HOME / OFF-DUTY

Base black outfit and a soft oversized hoodie keep Ami grounded in the cozy house scenes.

FIELD / TECH

A cropped field jacket supports contracts; the sleek tech look suits PC, shop and research interactions.

IDENTITY LOCK

Preserve her shoulder-length black hair, warm brown eyes, compact silhouette and calm confidence in every outfit.

FACE + HAIR STAY CONSISTENT

Pose rule: readable hands, clear prop silhouette, one dominant line of action.

Every exorcism earns a visible discovery.

COLLECTION LOOP

**Known faces feel earned.
Unknown faces invite the next
job.**

8

EXORCISED

Full-colour portraits show demons already cleansed and catalogued.

4

UNDISCOVERED

Dark silhouettes and question marks promise future contracts without spoilers.

1×

TAP TO INSPECT

Open lore, client notes, difficulty, reward and encounter history.

Production rule: every portrait uses the same frame, eye line, scale and four-state icon system.

Pixel art makes the physics readable at a glance.

CORE SCREEN GRAMMAR

**Threat above.
Catch zone below.
Trash at the edge.**

01 SLAM + SPAWN

The cat's paw impact, violet shockwave and eye flash announce each projectile burst.

02 MOVE + CATCH

Mint spectral balls fall, collide and visibly stack inside the dangling net.

03 DUMP + CLEANSE

Dragging the loaded net into the bottom-right can convert catches into bar progress.

DROP LIMIT = FAILURE PRESSURE

3D keeps the same instant read.

3D TRANSLATION

More depth. The same instant read.

SOFT CLOTH NET

A short joint chain and restrained damping sell weight without making touch control laggy.

STACKED SPHERES

Simple round collision shapes create satisfying accumulation and cheap mobile physics.

LIT IMPACTS

Warm room light holds the cozy base; violet paw strikes and mint captures carry state.

FIXED CAMERA

A shallow perspective camera protects portrait readability across phone aspect ratios.

Target: stylized low-poly rendering, baked light where possible, 60 fps on mid-range phones.

One pixel grid keeps the whole library coherent.

CHARACTERS

Ami turn, idle and walk frames; cat breeds share eye line, base shadow and outline weight.

HOUSE

Desk, PC, seating, bed, storage, lamp, rug and cat furniture use one subdued indoor light.

GAMEPLAY

Net, haunted bin, spectral balls and impact VFX reserve mint, violet and amber for state.

CRISP / NO ANTI-ALIASING

Production baseline: 32 px units • 2-4 px outline • nearest-neighbour import • integer scaling.

Follow the system—then break it deliberately.

ALWAYS

- Establish warm, believable home life before adding the curse.
- Keep Ami, cats and primary actions readable at thumbnail size.
- Use violet, mint and coral only when their state meaning applies.
- Match 2D character lighting to the dominant 3D room light.
- Leave safe-area space before adding decorative detail.
- Build text, bubble tails, badges and effects as separate layers.

AVOID

- Generic Halloween imagery, gore, skull piles or satanic clichés.
- Bright neon on every object; spectral colour must remain scarce.
- Ruined typography for body copy, emails or long dialogue.
- Tiny scratches, noise and grunge that disappear on mobile.
- More than one equally strong primary action on a screen.
- 2D art that ignores the 3D camera angle or room lighting.

NEXT PASS

Email + contracts • Dialogue • Cat demon animation • Final HUD • Accessibility
